SACRAMENTO UPDATE

State Budget Update

The Assembly Budget Subcommittees completed their actions on the State Budget on Friday, May 30, 2008. The full Senate Budget Committee and Subcommittees are continuing to conduct hearings this week. As of today, the Senate Budget Committee intends to complete its work by Thursday, June 5, 2008. The Budget Conference Committee will commence its work beginning the week of June 9, 2008.

Significantly, both the Senate and Assembly Budget Committees acted last week to reject the proposed reductions to the Medi-Cal Safety Net Care Pool (SNCP) and the South Los Angeles Preservation Fund. These actions avoided a County loss of \$24.4 million (\$14.4 million for SNCP and \$10 million for the South Los Angeles Preservation Fund). Because both Houses took this action, these two issues would normally not come before the Budget Conference Committee. However, Conferees have the authority to open any item in the Budget regardless of whether it is deemed to be "in Conference."

In addition, both Houses rejected the Administration's proposals to make CalWORKs children ineligible for actions or failure to act by the parents, to eliminate State financial participation in IHSS wages above the minimum wage, and to reduce Child Welfare Services Administration funding. As previously noted, Conferees have the opportunity to open and act on these items with two votes from each House.

State's Cash Flow Situation

On Friday, May 30, 2008, the State Controller's Office held a briefing on the State's cash position. A copy of a handout from the briefing is attached for your reference (Attachment I). As of April 2008, the State had \$15.3 billion of potential internal borrowing available. It is currently estimated that the State will run out of cash and 'internal borrowing options by mid-September. Based on comments from the Controller's staff, it seems likely that a decision to borrow externally will have to be made sometime around the beginning of August, if the FY 2008-09 State Budget has not yet been enacted.

When cash receipts and internal borrowing are exhausted, it will be necessary for the State Controller, in conjunction with the State Treasurer, to initiate external borrowing. Options for external borrowing include Revenue Anticipation Notes (RANs) and Revenue Anticipation Warrants (RAWs).

RANs and RAWs have different legal and practical constraints which limit their use. RANs are short-term borrowing instruments that are the most common external cashflow tool employed by the State. RANs have low issuance costs and short issuance times, but they are only used for borrowing within a fiscal year. In addition, the State Budget must be enacted prior to their use. RAWs, on the other hand, can be issued in one fiscal year and repaid prior to the end of the next fiscal year. The State Budget need not be enacted prior to their issuance. However, RAWs are viewed as a "last-resort option" as they take longer to issue (two to four months) and the interest rates and issuance costs are generally higher under the best of circumstances.

The issuance of RAWs is further complicated by several factors. If RAWs are issued without an enacted Budget, the State's credit rating (already the second worst in the United States), structural deficit, and the fact that the State Budget was not enacted prior to the start of the fiscal year will negatively impact their issuance. These circumstances would lead to higher interest rates and issuance costs and create more stringent requirements for credit enhancements (similar to having a co-signer or guarantor). Further, the turmoil and uncertainty in today's credit and liquidity markets that was created by the sub-prime mortgage foreclosure crisis and the accompanying write-off of hundreds of billions of dollars in mortgage loans injects considerable uncertainty as to the availability of borrowable funds and credit enhancements.

The Governor's May Revision includes a \$10 billion RAN, which is larger than any RAN previously issued by the State. The size of the RAN is based on the premise that the Legislature would accept all the Governor's proposed Budget-balancing solutions from January and May. To date, it seems clear that a significant number of the program reductions proposed by the Governor lack sufficient support in the Legislature.

Each Supervisor June 4, 2008 Page 3

Additionally, the Governor's proposal to expand and securitize the State Lottery, subject to the approval of voters, may not have ample support in the Legislature. The Controller's staff indicated that the contents and shape of the enacted State Budget may still necessitate the issuance of RAWs, even if the State Budget is enacted in a timely manner.

CSAC Conference Highlights

On May 21-22, 2008, the California State Association of Counties (CSAC) held its annual Legislative Conference in Sacramento. Several of the key discussions and presentations focused on the State's budget crisis and potential strategies that will be used in the development of the FY 2008-09 State Budget. In addition, CSAC's Policy Committees held meetings on a wide range of topics of interest to counties. Key actions of the CSAC Board of Directors and an item of interest are discussed in Attachment II.

Status of County Sponsored Legislation

County-co-sponsored SB 579 (Wiggins), which would permit the Board of Supervisors to authorize reinstatement of firefighters who were forced to retire on or after April 1, 2007 because they had reached the age of 60, and remove the mandatory April 1, 2009 retirement date for a Fire Chief in a county of the first class, was signed by the Governor on Monday, June 2, 2008. As an urgency measure, SB 579 (Chapter 21, Statutes of 2008), was effective immediately.

We will continue to keep you posted.

2007-08 at 2007 Budget Act

Types of Borrowing

Internal Borrowing:

- By law:
- The General Fund can only borrow from special funds on a short- term basis as needed.
- The General Fund cannot borrow from certain funds, such as the Public Employees' Retirement System Fund, State Teachers' Retirement System Fund, and Local Agency Investment Fund.

Ì

- The borrowing cannot interfere with the operations of the special funds. I
- The current estimated borrowable amount stands at \$15.3 billion, as presented to the Pooled Money Investment Board in April 2008. This amount is updated quarterly.

Types of Borrowing

External Borrowing:

- receipts and disbursements and must be repaid by the end of the Revenue Anticipation Notes (RANs) are short-term borrowing instruments used to smooth cash flow due to irregular patterns of fiscal year.
- Revenue Anticipation Warrants (RAWs) are borrowing instruments used to address cash flow problems that may span a period of two fiscal years and may be issued with no State budget in place.

Cash Management of the State

Registered Warrants (IOUs) are interest bearing instruments issued to replace regular warrants when there is insufficient cash in the General Fund to pay the State's obligations. IOUs are utilized when short term borrowing options are Other Cash Instruments exhausted.

Comparison of External Borrowing Instruments

<u> </u>	5	-	-		
Registered Warrants (IOUs)	ON		Within 2 weeks	Subject to cash availability	
RAWs	ON		2 – 4 months	By the end of the next fiscal year	9
RANS	Yes		4 - 6 weeks	Within the fiscal year of issuance	24
	Must a budget be enacted prior to issuance?	Generally how much lead time is required	to issue?	When is repayment required?	What is the frequency of issuance in the past 25 years?

Issues and Considerations

- RANs An enacted budget normally eliminates the need for credit enhancement (a third party guarantee of repayment).
- RAWs Issuance costs may be higher than a RAN due to credit enhancement requirements.
- majority of payments (debt service, education, payroll and 10Us - Federal and State statutes prevent issuance for a Medi-Cal).
- failure to adopt a timely budget and structural deficit) can be Credit Rating Impact - Underlying budget and economic circumstances surrounding the issuance of a RAW (e.g. negative indicators to the credit rating agencies.

Problems in Credit Markets

- Distress in the mortgage industry continues to adversely impact the credit/liquidity markets, and will until the economic environment improves.
- sub-prime mortgage problem will end or to what extent it osses exceeding \$275 billion. No one knows when the Financial institutions already have written off or taken impacts other sectors of the economy.

Bottom line: Credit enhancements for a RAW in 2008-09 will be extremely difficult and expensive to secure.

CSAC CONFERENCE HIGHLIGHTS

Action Items

<u>Parole Realignment</u>. The CSAC Board of Directors approved the recommendation of the Administration of Justice Policy Committee to oppose the Legislative Analyst's Office (LAO) Parole Realignment proposal. In addition, the CSAC Board of Directors approved recommendations for CSAC to advance other options on Parole Realignment that include additional funding for adult probation services and the movement of low risk offenders to community based programs. CSAC indicates that that there are very few resources and programs available at the local level to address the service needs of adult probationers.

CSAC also expressed a willingness to continue to participate in future Parole Realignment discussions. In addition, technical revisions to CSAC's Corrections Reform County Policy Principles and Guidelines were approved to reflect references to CSAC's Realignment Principles, adding a principle related to completing reentry plans prior to a probationer's transition back into the community, and ensuring proposals adequately address impacts on local criminal justice systems.

Sex Offender Management. The CSAC Board of Directors approved the recommendation of the Administration of Justice Policy Committee to adopt a policy on sex offender management. The policy considers emerging best practices and outlines the role of counties in managing the sex offender population. The document was a collaborative effort of a Statewide working group of county sheriffs, supervisors, probation officers, and other representatives of county government. Specifically, the fundamental principles and policies included: the need for a sex offender management policy that contains restriction clauses that focus on an offender's movements rather than their residence; coordination of sex offender management among counties; the need for community education; use of compatible technologies to allow monitoring throughout the State; the need for stable and sufficient funding by the State to implement an adequate management system; and a reexamination of sex offender management policies at state and local government levels in order to reflect the most current laws and decisions of the courts.

Statewide 2-1-1 System. The CSAC Board of Directors approved a recommendation from San Diego County to support Statewide coverage of 2-1-1 systems to provide community and non-emergency disaster recovery information and referral services. In addition to the day-to-day benefits of 2-1-1 in providing residents with information and referrals on health and human service programs, the San Diego County 2-1-1 system played a critical role in disseminating information to residents on mandatory evacuation orders, shelter locations, road closures, relief and recovery resources, and donation and volunteer opportunities during the major wildfires of 2007.

Approximately 91 percent of California is projected to have 2-1-1 access by 2009. The goal included as part of the recommendation is for 100 percent coverage throughout the

State by 2010. Funding remains a critical issue, especially for smaller counties with little or no call center infrastructure. 2-1-1 California continues to pursue State and Federal funds for pilot projects designed to acquire the necessary infrastructure. Several implementation strategies were discussed, including central call centers that may serve multiple counties.

<u>SAFETEA-LU Reauthorization Priorities and Principles</u>. The CSAC Board of Directors approved the recommendation of the Housing, Land Use, and Transportation Policy Committee to adopt draft priorities and principles for use in advocacy in upcoming discussions related to the reauthorization of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). SAFETEA-LU authorizes Federal surface transportation programs for highways, highway safety, and 'transit for the 5-year period 2005-2009.

The priorities and principles include the need to: streamline the approach to the allocation of Federal funds; protect and enhance transportation revenues and expenditures; protect previous and future investments through system maintenance and preservation; increase safety on existing transportation systems; improve environmental stewardship and address climate change concerns; streamline regulatory and project delivery processes; increase State, regional, and local flexibility to respond to needs; provide assistance for data collection; and provide an incentive program for agencies that exceed expectations.

Item of Interest

County Mental Health Plans. The Health and Human Services Policy Committee provided updates of several health and mental health topics. One topic of interest to the County dealt with county mental health plans for Medi-Cal specialty mental health services. The CSAC staff report to the Committee outlined the responsibilities of county mental health plans, difficulties encountered by counties in serving as the managed care plan for specialty mental health services, State General Fund and Realignment revenue issues, effects of medical inflation and increasing prescription drug costs, potential impacts of the State budget deficit, Federal rule changes, and State Department of Mental Health issues. As a result of the increasing difficulties to provide the services contemplated under the mental health plan, the report noted that three counties, including Glenn, Shasta, and Riverside, are contemplating refusing to serve as the mental health plan for their respective counties.
